

# BEST PRACTICE ALERT

## Title: MANDATORY TRAINING & CERTIFICATION

We provide training and certification to all our Crane Operators, Riggers & Banksmen by an external agency approved by statutory authorities. This training is to ensure that all those involved in lifting operations are competent to carry out their work safely. Tower Cranes, Mobile Cranes, Lifting Equipments and Accessories are tested and certified by third party. We also adopt colour coding systems for all our lifting equipments and accessories. A tag with current colour code is displayed at the site and frequent training is provided to all the workers involved duly explaining risks and safety measures identified in the risk assessment for lifting operations.
